G/F	Computer terminals (160-seat open-plan)	Japanese tea room	Student amenities and activities centre	Main entrance
LG1	Workshop			
LG2	Plant room			

Updated space use of AC3

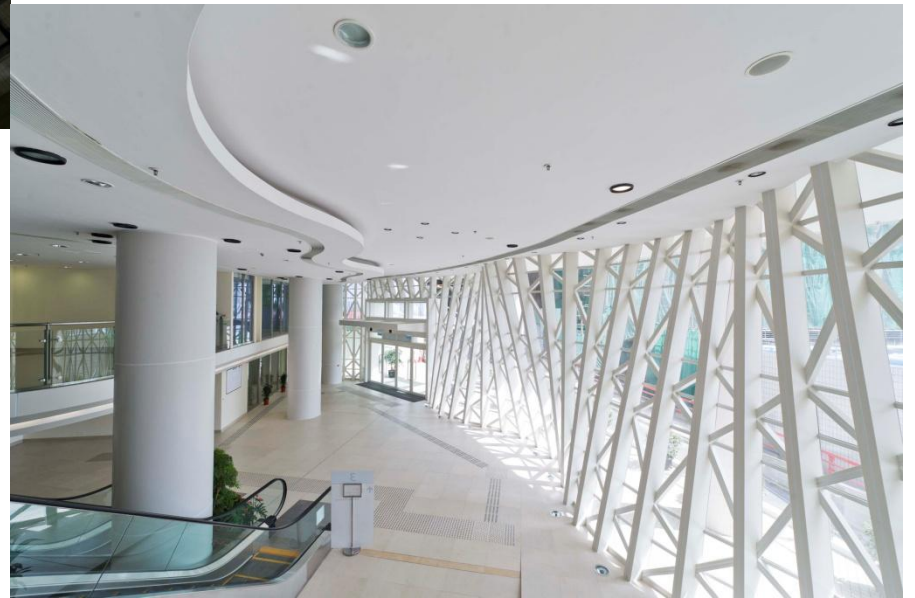

AC2

The exterior design of AC2 represents a ribbon connecting in flowing lines.

The remarkable window system, which twists in two directions and lets in natural light, is unique in Hong Kong.

AC2

The main teaching facilities are arranged on the lower floors; the learning commons are located at the building perimeter or around the central atrium.

The skylight over the oval atrium allows natural light into the interior of AC2.

AC2

Sky garden

Lecture theatre
